

## Parc dels Colors Mollet del Vallès, Barcelona, Spain

" A place where it rains every morning-  
– early-"

"Imagine a building which stays on a topography which doesn't exist.."

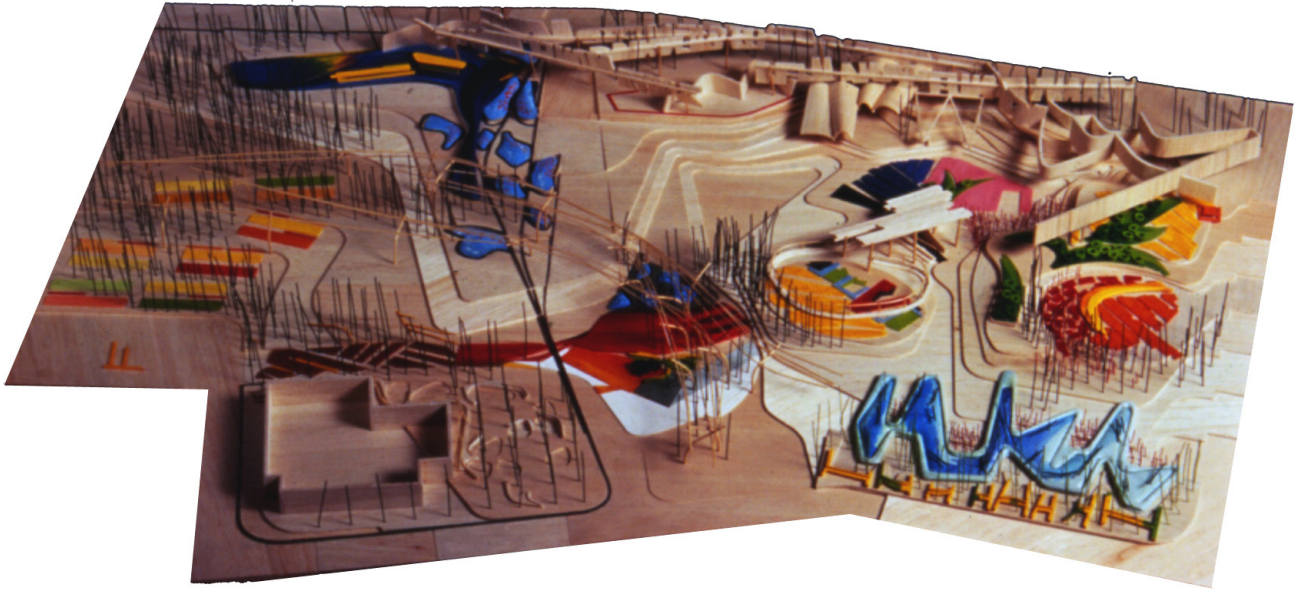

Were we negating the land?

There are few empty lands in the periphery such as the one we found here.

Maybe the people living here: the emigrants and the old people, will substitute with their own bodies the land and topography, resembling Chagall's paintings as they sustain the building top of themselves.

Client: Mollet del Vallès Town Council
