

Kate Lamp Milan, Italy

Floor lamp with double switching. Two different lights can be obtained: widespread through the shade or indirect through the upper diameter of the lamp shade. With its supporting rod, lampshade made of methacrylate and mesh of metal or opaline blown glass and matt black paint finishings, it is a modern interpretation of Chinese lanterns.

Wall lamp with double switching. Two different lights can be obtained: one spread through the shade, the other indirect through the upper diameter of the lamp shade.
